READ TERMS

# NS : \ [newSyllabus.org](http://newSyllabus.org)

- **run script**
  - read code
- *Main framework*
  - Block-chain host server
  - *Web application*
  - **U:** \ user access portal
  - *Firmware* underlying **NS:** \ operating systems command (**OPSCOP**)
    - **DISIS**, **Policy Bureau**, **OM**, **OD**, **FLF-DAO**, **FTLU**, and **WKPS**.

Walter Kogard Public Shul (WKPS), The Institution of the New Syllabus DISIS, Mission of Djedu, FLF-DAO, FTLU

# M:\IST<sup>T</sup>

- Mind-software (**M**indsoft)
  - **M**:\ human Memory drive
  - Central Nervous System (**C**NS) perception
    - Input/Output data (**I/O**)
    - Cognitive behavior (**cogb**)
  - Human mind processor **I**<sup>2</sup>>**C**:\ driver
- Information Systems (info**S**ystems)
  - Memory
    - Record databases of information; stored functions
- Tecknowledg**e**y
  - Technical Knowledge (use of tools)
    - Intelligence; maps, models, methods

# G:\OST<sup>T</sup>

- General Operating System Theory

- **Clinical**

- Peer/Client (PC) interfacing; GUI; communication network drive

- **Dialectic**

- D:\ drive of dialogue; assembly (adversary/advocacy/parliament)
- Thesis<->Synthesis<->Antithesis; solve for function  $f:x \rightarrow y$

- **Information**

- Memory; databases of CNS perceptions

- **Processing**

- Cognitive-behavioral performance (cogb)
- CNS (hardwired firmware, ROM) + LBC (code, language)

- **Systemtheory**

- A conceptualized theory of knowledge, in general (“Gnowledge”).
- G:\ drive of the “Geometry” or “Grand Architecture Order and Design (GAOD)” of the Universe.

# I:\PS

- I nformation Processing Service

- I:\ = processor + server

- Serves: provides functionality (to self, other PCs)

- DO(process)

- » DO(work)

- I:\ = driver of self Central Control

- Monitor Position and Direction
- “Whole Person” Concept
- Intelligence (inside)

# C:\PU

- Central Processing Unit

- Central Processor “You” = U:\

- C:\ drive for cogb processing

- Cognitive-behavioral Processing Server

- Conscience, Un/Consciousness, Cognizance

- Read-Only Memory (ROM)

- “HoTy See” C:\

- external memory drive serving NS:\ blockchain record datasets

- » Business proprietary information

- » Licensure required

# CP/M

- Control Program/Monitor

- Monitor control program for **I:\C:\[self]**

- **Position**

- Central Control (**C:\[self] squared > A:\quadratic**)

- **Direction**

- Process; run programs; development (**D:\dialectic**)

- **Reflection**

- Monitor operations; development operations (**DevOps**)

# KoS-DevOps

- Knowledge of Self Development and Operations (**KoS-DevOps**)
  - Literacy-Based Competencies (**LBCs**)
    - Psychosomatic (Mind-Body **CNS** perception)
    - Syntactic-Semantic (Trivium Grammarie)
    - Visual Semiotic (Symbol/Sign process)
- a.k.a., **selfmetaprogramming**
  - Acquire and store information to **devop** systems to know yourself (**I:\**), to see (**C:\**) clearly, and to solve (**y**) for matters in question (**x**).

# AAAA Service Corp.

- Audit
  - notice
- Assessment
  - data
- Assurance
  - information
- Adjudgment
  - knowledge
    - C:\[quadratic]
    - A:\ drive for
      - I:\>\_C:\squared
      - I:\>\_C:\y(x)
